Thanks Alex, I've reviewed and don't have any substantive changes. Per our conversation, I understand that it is difficult to pull out specific examples without putting unnecessary or implied negative attention on a specific company or chemicals.

Team OPA/OGC/Travis, can you review quickly and turn around any edits or suggestions (outside of those Molly already sent)? Need to get this buttoned up ASAP.

Also, looping in RJ per Molly's suggestion since it is TSCA related.

Thanks,

-Aaron

Subject: RE: March 13 hearing. LATEST VERSION.

We tried all afternoon to get MORE SPECIFIC but cannot due to proprietary slippery slopes (chemical names etc). Still I think we have done better.

See below statement from EDF in advance of the hearing. We will double check to see if we've hit the high points they're talking about.

Post also available at <http://blogs.edf.org/health/>: If you would like to opt out of receiving these emails, please [click here](#).

EDF statement in advance of house hearing on failure by the Trump EPA to protect workers from toxic chemicals

By [Richard Denison](#) / [Bio](#) / Published: March 12, 2019

[Richard Denison, Ph.D.](#), is a Lead Senior Scientist.

Tomorrow, the House Energy and Commerce Committee's Subcommittee on the Environment and Climate Change will hold an oversight hearing on "[Mismanaging Chemical Risks: EPA's Failure to Protect Workers](#)." In advance of the hearing, Environmental Defense Fund lead senior scientist, [Dr. Richard Denison](#), made the following statement:

"Under the Trump Administration, every aspect of EPA's implementation of the Toxic Substances Control Act (TSCA) — our recently reformed chemical safety law — has gone off the rails. The Trump EPA has abdicated its authority and responsibility under the law to

address risks to workers. Among the ways EPA has shirked these duties are the following:

- **Clearing new chemicals despite risks to workers.** EPA has approved new chemicals for unfettered market access even where the agency has identified significant risks to workers or has indicated it has insufficient information to determine risks to workers. EPA has done so for many dozens of chemicals.
- **Abandoning worker protections from methylene chloride.** EPA is poised to finalize a ban of methylene chloride-based paint strippers far narrower than the one it proposed over two years ago. While consumer uses will be banned, EPA will not limit commercial uses, leaving workers, who are most at risk from these products, unprotected.
- **Ignoring worker safety in chemical risk evaluations under TSCA.** In the only draft risk evaluation of a chemical issued to date, EPA relied exclusively on a single undocumented workplace air concentration value, provided through a private personal communication by a conflicted industry source, as the basis to conclude that workers across the supply chain for this chemical face no significant exposure to the chemical.

“Oversight of this EPA’s reckless approach to worker protection under existing law is long overdue. We applaud the subcommittee for holding this hearing. This EPA is putting the public’s health – especially worker’s health — at risk by systematically weakening and undermining chemical safety: the agency must be held accountable.”

Subject: RE: March 13 hearing.

Definitely getting better. Thanks Tala. I would like to ask OPP and OPPT to give an example each even more specific. For example, in new EPA regulations promulgated under EPA requires applicators of xxx pesticide to xxxx or how we looked at the risk to applicators/workers and how the final rule addressed workers.

How about something public around a new chemical reviewed under TSCA? IE a SNUR can require: use of worker personal protective equipment (PPE); new chemical exposure limits (NCEs) for worker protection; and hazard communication language – all of which can protect workers. Can we cite to any public SNURS?

Here's an updated version of the letter with our edits and comments. As we note, it really needs substantive examples of what real world results we see at the end of the process described in the current letter that will be compelling and change the narrative that is being put out during this hearing.

OCSPP/OPPT, can you provide factual examples of the work we've done that has led to increased worker protection or ensuring these standards are met that we can include?

Subject: RE: March 13 hearing.

Thanks, I've taken a run at it and having my team do a pass as well. Will send an updated version shortly but would like to get everyone thinking about potential examples of worker protection actions in all OCSPP/EPA activities we have taken that can be cited as well.

Right now we outline the program and the worker protection requirements we carry out in executing it, not the real world results we see at the end of the process that will be compelling and change the narrative that is being put out during this hearing.
